SIX EASY TO FOLLOW STEPS FOR SETTING UP A NEW RECLAIMED WATER SERVICE

The following 6 steps should help to further clarify setting up the new reclaimed water service available in Westwinds and Grassy Pointe:

Step 1: Homeowner to fill out and submit Utility Availability Statement paperwork.

Step 2: Homeowner sets up new reclaimed water account by paying for new meter at City Hall Customer Billing Dept. (this can be done the same time as Step 1)

Step 3: City staff installs new reclaimed water meter inside the purple coated box.

Step 4: Homeowner/private plumber completes the connection from the new reclaimed water meter to the home's existing irrigation system.

Step 5: Homeowner calls the City to request mandatory inspection of the completed connection to the new reclaimed water meter. Please call 727-942-5609 Option 1

Step 6: City inspector to re-visit the home to test that reclaimed water is piped only to the irrigation system (for your safety).

Once steps are complete, now enjoy the tremendous benefits of irrigating with beneficial and sustainable reclaimed water.
